VideoGirls.BiZ developed a free, GPL, Joomla 1.5 module that enables Joomla users to automatically login to a Video Girls system. This is a great module to use if you have a Joomla site with many members and want to offer them pay per view / pay per minute video chat services. This works with all Ateom powered turnkey sites including Video Girls BiZ, Software for Dating, Match Agency BiZ, Buy Dating Site.

This module automatically creates accounts for Joomla users that are logged in.
Account type (member group) and profile type for account that is automatically created can be configured from module parameters.

This module creates accounts using same username and email used for the Joomla account. If users already have an account with the VideoGirls script (any type) and use the joomla username and email, the module will not create a new one. It will just provide access for the existing one. That means webmaster can promote member accounts to performers or affiliate groups and automated login will work fine for these.

Other profile types (performers, affiliates) must register using the VideoGirls system or can be promoted from regular accounts by webmaster.

Demo and Testing

1. Create instantly an account on this Joomla website.
2. Login from Account module.
3. Click Enter on Video Girls module and you should automatically be logged into the ppv videochat site.

Download

After installing VideoGirls BiZ and Joomla download the Ateom Members Joomla Module .

Installation

1. Login to your joomla administrator area.
2. Go to Extensions > Install/Uninstall and Upload Package File.
3. Go to Extensions > Module Manager and click Ateom Member Integration.
4. Fill relative VideoGirls installation url (if you have joomla on your main site and VideoGirls BiZ in videogirls folder fill "videogirls" as folder).
5. Fill VideoGirls BiZ mysql database access details (as listed in the settings.php file).
6. Enable module.
